Where can I find the part number (FGA) and serial number for my Schneider Electric Solar equipment?

The part number or FGA (Finished Goods Assembly) number is on the ratings label for the equipment. The serial number is usually an additional printed label added over top of the ratings label. Please see the images below for examples. Usually this label is on the side of the equipment. On the Conext™ XW+ it is on the top and on the Conext™ SCP, Conext™ AGS, and Conext™ Combox it is on the back.
